Zombie gunship mod apk data

Zombie (undead) is always my favorite topic. It has become the subject of many famous movies, and zombie games also attract millions of players. So, Limbic released Zombie Gunship Survival MOD APK (No Overheating), the best zombie game of 2011. Since then, the game has more than a million downloads on Google Play. Now it has become the most worthy game of all time and gets a lot of positive reviews from the players. Table of Contents [Show/Hide]Name: Zombie Gunship SurvivalPackage: com.flaregames.zgsPublisher: FlaregamesCategory: ActionVersion: 1.6.14Size: 412MMOD Features: No OverheatingRequires: Android 4.3There are many zombie games on the market, so we always look forward to a unique and different game, not just a first-person shot-em-up shooter game. Fortunately, Zombie Gunship Survival is one such game. In Zombie Gunship Survival, you are the last line of defense between zombies and the human world. Your task is to kill zombies before they kill people and get to the base of your military. You will control the weapon system on AC-130 aircraft, destroying the zombie waves underground before reaching the secure tunnel where the survivors are hiding. Collect resources from friends you sent to build your own military base. Every time you complete the mission you will get a rewarding and these can help you in many things like upgrading weapons, getting equipment bonuses, etc. Weapon: Like other zombie games, Zombie Gunship Survival has the most sophisticated weapons with about 30 different types of guns, rockets, AKM, sniper rifles, ... At the beginning you will be equipped with three types of weapons, these are 25mm auto cannon, 40mm automatic pistol, and gatling pistol. You can then rely on the bonus earned from completing the zombie killing quest to upgrade your weapon. Depending on the speed and range, the type of zombies you can choose the most suitable weapon. The game has two types of zombies that are small zombies walking and huge zombies running fast. You can face them in different maps with different difficulty levels. To destroy them, you need a specific strategy that fits the characteristics of each map. Use the most powerful weapon you have and kill them all, protect the world. Maps: Currently this game has four maps for players to freely choose: Bunker Charlie: The map is surrounded by hills. Bakersfield: As an industrial power plant, there's a train going through it every few minutes. Nice Acres: Including the roads around the house. Lockdown: The new map is released, it's like a big prison with walls surrounded. Each map has a sanctuary, skillfully takes people there before they are eaten by zombies. There are quite a few players who say that the game's maps need to be updated with something new instead of some repetitive scenes. Graphics and sound: Zombie Gunship Survival features high-quality 3D graphics, realistic image quality. The whole game is dark tone with two different modes: Zombie BHOT mode is white, the person is black, position is the opposite. The color of the game is the same as when using infrared glasses to observe everything at night. You can switch between modes to create the best experience for yourself. The sound of Zombie Gunship Survival is unique and exciting. I feel pretty scary when the mysterious music of the game is played. Zombie Gunship Survival MOD APK version: MOD feature: No Overheating. How to install Zombie Gunship Survival MOD APK? If you install the MOD version and get the download failed because you may not have purchased this app, it's because you haven't installed the game's OBB file. Don't worry about it. Please follow the steps below: Important! If you installed the original version from Google Play, please remove it before performing the installation of the MOD version. Download APK and OBB (MOD versions) files via the link below. Unpacking: com.flaregames.zgs.zip. Copy the folder com.flaregames.zgs in the Android/obb folder. Double-tap the APK file, install it like any other standard APK file. You can update the MOD version without losing data if and only if both the old version and the new version are downloaded from APKMODY. When a new version is available, simply download and overwrite the previous version.
